Format for Preparing Study Contents

You have to develop the Study Materials in 2 parts for the following segments of the students:

(i) For those who don’t know ABC of the subject: Your target student is not interested in the subject and wants to score just passing marks in the exam. You have to make the concepts simple and short. The contents should be explained in a lucid manner just like a storyline. The lessons should be precise with most probable questions for the forthcoming exam. (This is not applicable if you are preparing contents for any competitive exam.)

(ii) For those who want to score 100% marks: The entire syllabus should be meticulously planned with thrust on developing fundamental knowledge of the subject. The contents have to be elaborated comprehensively and students should not say that any question asked in the exam is not available in the study materials prepared by you.

The study contents should be arranged under following sections:

Lesson Plan: A solid grounding with systematic arrangements of the courses prescribed for the exam. You have to break up the syllabus as units/lessons and specify its worth (Most Important, Important, Conceptual/Fundamental), weightage (Easy, Normal, Difficult, Very Tough), marks and study time (in hours & minutes to finish the lesson for an average student) as given below:

<table>
<thead>
<tr>
<th>S.N.</th>
<th>Lesson/Unit Name</th>
<th>Worth</th>
<th>Weightage</th>
<th>Marks</th>
<th>Study Time</th>
</tr>
</thead>
</table>

Units/Lessons/Topics: The study contents have to be prepared strictly according to authoritative syllabus as per latest examination trends. Each lesson should be self-contained with logically arranged solved problems. Each topic should be conceived and explained in a lucid style enabling students to grasp the basic concepts and its manifold applications to evince requisite interest while studying. The lesson should follow the instructional design methodology using maximum illustrations with figures, diagrams, and up-to-date data wherever necessary for interactive learning content development.

Questions & Answers: Each lesson should contain (a) Descriptive problems and answers, (b) Short & very short question-answer type (c) Numerical questions with solutions (wherever possible) and (d) 100 Objective questions with multiple choice (4 options) and right answers with explanation for each lesson. For MCQ and descriptive questions from each lesson you have to prepare 20% questions as -> Easy, 40% as -> Normal, 20% as -> Difficult and 20% as -> Very tough.

Terminology: A cross linked reference dictionary should be given for difficult words (to be explained separately in box).

Success Tips: Guidelines for (a) how to prepare and take full advantage of the study materials developing intellectual curiosity and (b) practical tips for scoring highest markers in the examination should be given.

Important Instructions: First you prepare objective questions only for one lesson as per the above format and get it approved by our editorial team. Next prepare rest of the lessons accordingly. Contents submitted by you should be written in your own style and lucid manner. It any part of the contents uploaded by you is found to be copied and pasted (verbatim) from a published book or from the internet, your contents will be summarily rejected and your name will be struck off from the Writer’s Panel.
Your remuneration:

1. Multiple Choice Objective Questions with Answer and Explanation: Rs 5/- per question
2. Short Answer Questions/Short Topic Explanation: Rs 3/- per question/topic
3. Long Answer Question/Long Topic Description: Rs 15/- per question/topic.

Royalty income: You'll get Rs 50/- on every sale of the e-Learning contents till you remain associated with the Subject-Title and are ready to do necessary improvement, modification and updation of contents as per the changes in syllabus, users feed backs and market demands, as and when required. Also you have to answer and solve online the queries, doubts of the students related to your subject-title.

How to start: Please send an email stating the following details and get it approved:

(i) Subject Name:
(ii) Course/Exam Level:
(iii) Board/University/Exam conducting body:
(iv) Medium: English/Hindi.
